

NICHE PLAQUES WITH INTEGRATED VASES

Phoenix Foundry manufactures a wide range of cast bronze plaques as memorials for deceased persons who choose to be cremated.

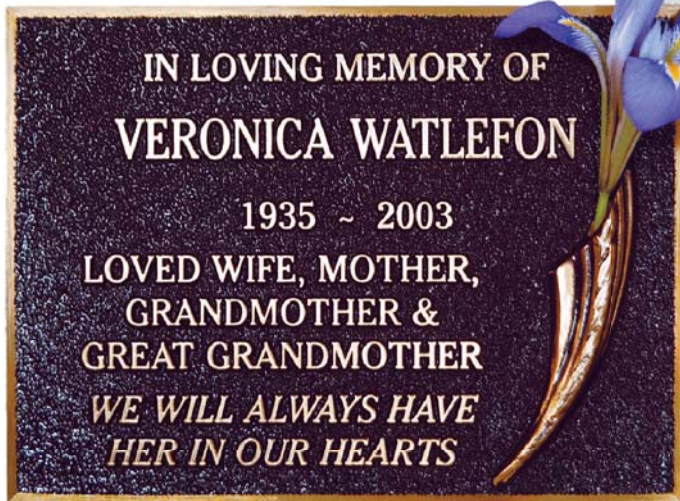

Cremated remains are often interred in Niche Walls with the bronze plaque fixed over the niche containing the ashes.

In this situation, friends and relatives will fix small flowers to the plaque.

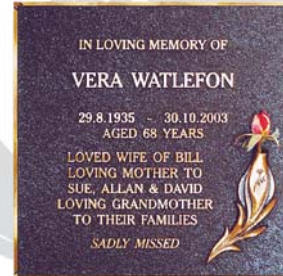

This practice can be provided for by separate bronze vases being supplied with the plaque and fixed alongside on the wall. This series of plaques is designed with small vases on the plaque
