

RSL AND VETERANS

Veterans & associated service organisations are entrusted with the commemoration of the large numbers of ex-service people who have contributed to the preservation of our country and made possible the liberty & economic well being we all enjoy today.

Veteran's associations can erect permanent memorials containing just a few names or many hundreds. The combination of materials such as bronze & stone produce a high quality, durable & long lasting statement to the memory of those who have sacrificed so much.

Honour rolls can contain the names & any other data such as rank & service details. Phoenix's compositors can arrange all the data in a logical format & provide a full sized proof so that the proposed plaque can be publicly displayed to ascertain any errors or omissions before the plaque is manufactured.

Cast bronze letters have been used since ancient times & have withstood the onslaught of modern competitive materials to be a premium product for the identification of memorial structures.

For many years, Phoenix has been chosen to provide sculptural bronze elements for public memorials. Recent monumental work by Phoenix includes Duntroon, RAAF Memorial in Canberra & The Australian War Memorial in London.

A range of military insignia is available in standard sizes alternatively our sculptors can create to order.

The use of cast bronze will permanently commemorate servicemen in an impressive & dignified way.
