

# SCULPTURED BOOK PLAQUE - REPLACEABLE PAGES

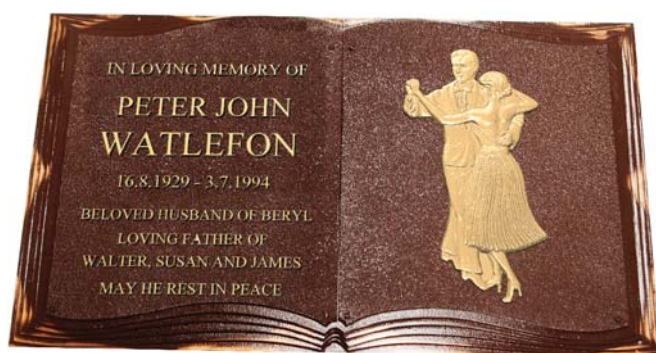

Phoenix book plaques are bronze memorials for partners in the form of a book which cater for any time difference between the passing of each partner.

- > The Sculptured Book plaque is 560mm wide x 320mm high.
- > The system consists of a high profile base with two options for pages.

## TWO SINGLE PAGES WITHOUT BOOKMARK

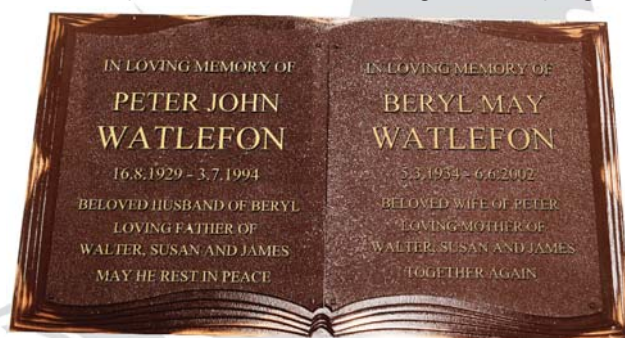

### > First Interment

At the first interment, the base is supplied with the left hand page containing the inscription fitted. At this time a blank right hand page can be supplied to balance the plaque appearance. A further possibility is for the right hand page to contain a motif.

### > Second Interment

At the second interment, a right hand page is ordered with the inscription for the second partner. If a right hand page had been fitted with the original plaque, this will be removed and replaced with the new right hand page.

## DOUBLE PAGE WITH BOOKMARK

With this option, all design elements are incorporated on a one piece double page incorporating a raised finished bookmark.

### > First Interment

The base and double page are ordered. The page will normally have an inscription on one side of the bookmark and be left blank on the other side.

### > Second Interment

At this time a new double page is ordered with the original inscription together with the new inscription for the second partner.
